PROFILE

Results-driven Full Stack Web Developer specializing in Next.js, Prisma, TypeScript, Tailwind CSS. Proven expertise in crafting dynamic e-commerce platforms. Pursuing a Systems Engineering degree.

EMPLOYMENT HISTORY

Full Stack Developer, Corpesca C.A

Remote

Jan 2023 — Nov 2023

I was responsible for creating a nationwide and international e-commerce platform for a seafood company from scratch. My role encompassed 95% of the web development work, involving the use of cutting-edge technologies, including Next.js, TypeScript, Prisma, PostgreSQL, Git, and GitHub. The project required a high level of proficiency in these tools and frameworks.

Key Responsibilities and Achievements:

- Developed almost the entire e-commerce website, implementing advanced features to meet the client's needs.
- Created a user-friendly forum with a filtering mechanism to display only answered questions.
- Designed and implemented two administrative panels to facilitate efficient delivery management.
- Integrated various API's to enable seamless product purchasing functionality.
- Implemented robust authentication and authorization systems for enhanced security.
- Utilized external banking API's for payment confirmation, ensuring secure transactions.
- Successfully executed the implementation of a multi-lingual web application, enhancing global accessibility.
- Successfully deployed both the database and web application on a VPS hosting and neon hosting for the PostgreSQL database.

Tech Stack:

- **Front-end:** Next.js 13.4.3, TypeScript 5.0.4, Tailwind CSS 3.3.2, i18next.
- **Back-end:** Next.js 13.4.3, Prisma ORM 4.1.5.0, PostgreSQL 15
- **Version Control:** Git, GitHub
- **API Integration:** NextApi
- **Authentication/Authorization:** Nextauth 4.22.3, React-hook-form 7.45.2
- **Payment Confirmation:** External banking API's
- **Internalization:** i18next
- **Deployment:** AWS Amplify

Full Stack Web Developer, BH Creative

Spanish

In my role as a full-stack web developer at my second position in my own agency, I led the development of a dynamic website, seamlessly integrating services and a blog for SEO optimization. The project demanded a cutting-edge tech stack, showcasing my proficiency across various categories:

Front-end Technologies (Versions):

- Next.js (13.5.4)
- React (18.0.2)
- Tailwind CSS (3.3.3)
- TypeScript (5.2.2)

Back-end Technologies (Versions):

- Next.js (13.5.4)
- Contentlayer (0.3.4)
- AWS Amplify

Database:

- Supabase

This comprehensive tech stack underpinned the creation of a user-friendly and visually appealing website, demonstrating my commitment to leveraging the latest tools for efficient and modern web solutions.
