PROFILE

Results-driven Full Stack Web Developer specialized in Next.js, Prisma, TypeScript, Tailwind CSS. Proven expertise in crafting web solutions. Pursuing a Systems Engineering degree.

EMPLOYMENT HISTORY

Full Stack Developer - Imaliandme

Feb 2025 - present

Built and continuously expanded a business website into a larger full-stack platform with multiple administrative panels, catalog management, reservation flows, and email management features. Implemented scalable frontend and backend functionality to support progressive product growth, internal operations, and content management.

Delivered production-ready features using

Next.js 15.4.7, React 19.1.0, TypeScript 5, Prisma ORM 6.14.0, PostgreSQL, Tailwind CSS 4, NextAuth 4.24.11, and AWS S3 SDK 3.876.0.

Full Stack Developer - DKCARGO

Oct 2025 - present

Developed an air cargo web platform focused on China-Venezuela shipments, including multilingual support in Spanish, English, and Chinese for a broader international user base. Created administrative dashboards and user profile panels, implemented quotation workflows, automated transactional emails, and built additional operational automations to streamline logistics processes. Integrated real-time flight tracking through the FlightRadar24 API to improve shipment visibility and customer communication.

Built the platform using

Next.js 16.0.1, React 19, TypeScript 5, Prisma ORM 6.19.0, PostgreSQL, Tailwind CSS 4.1.9, NextAuth 4.24.13, AWS S3 SDK 3.940.0, and Resend 6.5.2.

Full Stack Developer, Corpesca C.A

Jan 2023 - Apr

2024

I was responsible for creating some nationwide and international e-commerce platforms for a seafood company from scratch. My role encompassed the web development work, involving the use of cutting-edge technologies, including Next.js, TypeScript, Prisma, PostgreSQL, Git, and GitHub. The projects required a high level of proficiency in these tools and frameworks.

Key Responsibilities and Achievements:

- Developed an e-commerce website, implementing advanced features to meet the client's needs.
- Created a user-friendly forum with a filtering mechanism to display only answered questions.
- Designed and implemented two administrative panels to facilitate efficient delivery management.
- Integrated various API's to enable seamless product purchasing functionality.
- Implemented robust authentication and authorization systems for enhanced security.
- Utilized external banking APIUs for payment confirmation, ensuring secure transactions.
- Successfully executed the implementation of a multi-lingual web application, enhancing global accessibility.
- Successfully deployed both the database and web application on a VPS hosting and neon hosting for the PostgreSQL database.

Full Stack Web developer, BH Creative

Sep 2023 - Nov

2023

On my role as a full-stack web developer at my own agency, I led the development of a dynamic website, seamlessly integrating services and a blog for SE optimization. The project demanded a cutting-edge tech stack, showcasing my proficiency across various categories:

Front-end Technologies (Versions):

- Next.js: (13.5.4)
- React: (18.0.2)
- Tailwind CSS: (3.3.3)
- TypeScript: (5.2.2)

Back-end Technologies (Versions):

- Next.js (13.5.4)
- Contentlayer (0.3.4) AWS Amplify
- Supabase

This comprehensive tech stack underpinned the creation of a user-friendly and visually appealing website, demonstrating my commitment to leveraging the latest tools for efficient and modern web solutions.
